EFFLUENT TREATMENT SYSTEM

Biomedical Wastewater Treatment System

RT ECO BMW 35

RT ECO BMW 75

RT ECO Wastewater Treatment System uses electro-coagulation and electro-oxidation technologies for medical wastewater treatment, simple and easy operation with lower sludge production. RT ECO Bio-medical WWT systems reduces the secondary pollution and uses no chemical compounds and are economic, safe and environmentally friendly.

RT ECO, an eco-innovative, bio-medical liquid waste treatment system treats bio-hazardous, potentially infectious waste containing infectious microbes body fluids, blood, urine, sputum, etc., as per bio-medical waste management regulations.

RT ECO BMW 125

Medical Industry, healthcare facilities equipped with RT ECO Bio-medical WWTP meets the standards and regulations, maintains effective water management and wastewater treatment solutions and save 80% fresh water through recycling.

Models

Model	Treatment Capacity (m ³ /day)	Flow Rate (Liters/hour)
RT ECO BMW-35	5.0	35
RT ECO BMW-75	10.0	75
RT ECO BMW-125	20.0	125
